

Nexign BSS

Delivering Operational Excellence, Ultimate Flexibility and Advanced Monetization

Nexign Business Support System (BSS) streamlines business processes and accelerates new digital-driven revenue opportunities for telecom operators who strive to become digital lifestyle enablers. With Nexign BSS, communications service providers (CSPs) can become faster and more ambitious in offering advanced connectivity and beyond connectivity services, monetizing 4G/5G networks, and building IoT ecosystems.

Carrier-Grade BSS for Leaders

For over 30 years in the market, Nexign has been supporting business transformation of leading CSPs who serve millions of customers around the globe.

Multidimensional Convergence

Nexign BSS supports monetization scenarios for any customer segment, any type and generation of network, and any payment model.

Open to New Business Models

CSPs can use the single Nexign platform to configure advanced telco services and co-create complex bundles for new verticals with partners.
